## Sensor Cartridge SC2 for toxic gases and oxygen

**Exchangeable sensor including digital value processing, temperature compensation and self control for the continuous monitoring of the ambient air.**

The sensor cartridge SC2 includes an electrochemical sensor element and an amplifier as well as a  $\mu$ Controller for measured values processing. All relevant data and measured values of the sensor element are stored fail-safe in the  $\mu$ Controller and transmitted digitally via the local bus to the sensor board SB2 or MSB2. The calibration management is also integrated in the  $\mu$ Controller of the sensor cartridge.

Calibration is done either by simply replacing the sensor cartridge or by using the comfortable, integrated calibration routine directly at the system.
